**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-49 are allowed over the prior art of record. The following is an examiner's statement of reasons for allowance: the related prior art (Koo et al US 7,133,689) teaches method of controlling transmission power to maintain a received signal to interference ratio (SIR) as close as possible to a target SIR (see abstract) .

On the other hand, the present applicant specifically discloses power control for a wireless transmit receive unit that transmit data signals in a forward channel in selectively sized block allocations when configured to make forward power channel adjustments as function of target metrics computed based on the data signal as received over the forward channel and setting the initial target metric value as a function of the last target metric computed immediately preceding block allocation and an inter-allocation adjustment based on the time space from the immediately preceding block allocation. These limitations, in conjunction with all other limitations, has not been disclosed, taught or made obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
